AGRITOX

Prevention and Mitigation of the Mycotoxin
Contamination of Food and Feed caused by
Climate Change

ERDF funding 1.465.604 €

Total budget 1.954.139 €

Apr 2019 | Dec 2021

www.agritox.eu

AGRITOX will provide information and technical solutions to avoid the contamination by mycotoxins, a growing challenge due to climate change. Toxicity alert systems and risk management plans will be developed for a better and safer cultivation, harvest and storage of food and feed, as well as to ensure safer products are delivered to the consumers, covering the whole value chain.

Project funded by the Interreg Atlantic Area Programme
through the European Regional Development Fund
